

## RISK INFORMATION

### 1 INTRODUCTORY PROVISIONS

1.1 Madison Six j. s. a., with its registered office at Slávičie údolie 106, 811 02 Bratislava - Staré Mesto district, Company ID No.: 56 856 229, registered in the Commercial Register of the Municipal Court Bratislava III, Section Sja, insert no. 381/B (hereinafter referred to as "Madison Six") is a provider of crypto-asset services supervised by the National Bank of Slovakia (hereinafter referred to as "NBS") on the basis of a licence to provide crypto-asset services granted by the NBS within the scope of NBS Decision No. 100-001-025-213, issued under No.: NBS1-000-112-470 on 17 December 2025 pursuant to Regulation (EU) (EU) 2023/1114 of 31 May 2023 on markets in crypto-assets (hereinafter referred to as the "MiCA Regulation"), which entered into force on 18 December 2025.

1.2 Madison Six provides the following crypto-asset services within the meaning of the

MiCA Regulation: custody and management of crypto-assets on behalf of clients;  
exchange of crypto-assets for funds; exchange of  
crypto-assets for other crypto-assets;  
execution of orders relating to crypto-assets on behalf of clients;  
receiving and transmitting orders relating to crypto-assets on behalf of clients; providing  
crypto-asset transfer services on behalf of clients  
(hereinafter collectively referred to as "services").

### 2 RISKS ASSOCIATED WITH CRYPTO ASSETS

2.1 Madison Six points out that the provision of services relates to crypto assets whose value depends on movements in the financial market, which, as a provider of crypto asset services, it cannot influence. At the same time, in connection with the provision of crypto asset services, it points out that any past returns are no guarantee of future returns.

2.2 The crypto asset market is volatile and the value of crypto assets can therefore rise or fall rapidly, significantly faster than other assets. Crypto assets are highly volatile and may lose some or, in extreme cases, all of their value, while market conditions and technical limitations may affect their availability or liquidity. They also use distributed ledger technology (DLT), which presents an increased level of risk in the event of technological infrastructure failure or third-party interference. For these reasons, investing in crypto assets is currently considered risky.

- 2.3 By ordering any service, the client expressly acknowledges and accepts the risk factors of depreciation and volatility associated with crypto assets, as well as the risk of a decline or even total loss of their investment in crypto assets.
- 2.4 Each specific crypto asset may pose a specific risk. Madison Six publishes a list of supported crypto assets on its website, along with links to white papers or books that describe in more detail the risk factors associated with these crypto assets. In addition, Madison Six makes available to clients, through these white papers or similar documents, all information about the main adverse effects of the consensus mechanism used to issue crypto assets, the climate and other adverse environmental effects of this mechanism.
- 2.5 Madison Six does not recommend investing funds whose loss could adversely affect the client's financial or personal situation, and does not provide any guarantee of return, stability of value of crypto assets or return on investment.
- 2.6 Crypto-assets and services are not covered by deposit guarantee schemes established under Directive 2014/49/EU of the European Parliament and of the Council of 16 April 2014 on deposit guarantee schemes, nor to investor compensation schemes under Directive 97/9/EC of the European Parliament and of the Council of 3 March 1997 on investor compensation schemes. These schemes only apply to traditional financial institutions, not to crypto-asset service providers under the MiCA Regulation. The client is not entitled to any compensation from the state or any other institution in the event of loss or devaluation of a crypto-asset.
